How that works?

Hybrid Gel to Oil texture.

Upon application to lip skin thick gel turns into a light, gliding oil that is evenly distributed over your lips, does not spread and does not leave a sticky feeling

Active complex of HyaPerl™ with molecules of lipophilic

hyaluronic acid deeply moisturizes delicate skin, highlighting beauty of your lips

Red pepper extract* enhances

microcirculation and causes delicate skin tingling. It gives lips a sensual volume, makes contour clearer and more expressive and enhances natural shade

Rosehip oil and vitamin E**

nourish the lips and provide antioxidant protection.

Glossy finish and shimmering particles make lips visually even more voluminous and smooth.
