

THE FOURTH GENERATION OF OXYGEN COSMETICS WITH 4D TARGET TECHNOLOGY

WHY SKIN NEEDS OXYGEN?

Oxygen is the basis of our lives. Absolutely all cells of our body need it, it is the fuel for almost all processes: cells without it will not be properly updated and will not synthesize necessary substances. Including skin cells. With a lack of oxygen, skin becomes duller, its elasticity is decreased, new wrinkles appear. To compensate for the lack of oxygen and restore vitality to skin, we have developed the fourth generation of oxygen cosmetics the Oxiology series.

UNIQUE TECHNOLOGY **4D TARGET**

Thanks to the 4D Target technology based on all formulas of the series, Oxiology products act at the same time in four directions:

- Patented oxygen complex Aquaftem[®] delivers oxygen from air into deep skin layers
- Oxygen Drones[™] deliver oxygen inside cells
- Arginine and active from seaweed DST-H boost up blood circulation providing skin by oxygen from the inside
- Antioxidant Tumerin protects cells of skin from oxidative stress

TARGETED CARE FOR ANY SKIN TYPE

The Oxiology series brings together products of various colors to start any skin type care. Each of them solves various tasks.

OXYGEN SHINING	Visually smooth out skin imper and make your face more reste
